SHORELINE MASTER PROGRAM SUBMITTAL CHECKLIST

This checklist is for use by local governments to satisfy the requirements of WAC 173-26-201(3)(a), relating to submittal of Shoreline Master Programs (SMPs) for review by the Department of Ecology (Ecology) under Chapter 173-26 WAC. The checklist does not create new or additional requirements beyond the provisions of that chapter.

STATE RULE (WAC) REQUIREMENTS	LOCATION	COMMENTS			
DOCUMENTATION OF SMP DEVELOPMENT PROC	ESS				
Public involvement, communication, and coordination					
Documentation of public involvement throughout SMP development process. WAC 173-26-201(3)(b)(i) and WAC 173-26-090 and 100. For SSWS, see WAC 173-26-251(3)(a)	Pg. 5-6	Documents contacts and locations			
Documentation of communication with state agencies and affected Indian tribes throughout SMP development. WAC 173-26-201(3)(b)(ii) and (iii), WAC 173-26-100(3). For saltwater shorelines, see WAC 173-26-221(2)(c)(iii)(B). For SSWS, see WAC 173-26-251(3)(a).	Pg. 5-6	Documents contacts and locations (Table 2a-2b)			
Demonstration that critical areas regulations for shorelines are based on the SMA and the guidelines, and are at least equal to the current level of protection provided by the currently adopted critical areas ordinance. WAC 173-26-221(2)(b)(ii),(iii) and (c).	Pg. 1 CAO Draft Document, 2002-EES	Kennewick is updating both the Critical Areas Ordinance and the Shoreline Master Program together to eliminate any regulation conflicts between the two.			
Documentation of process to assure that proposed regulatory or administrative actions do not unconstitutionally infringe upon private property rights . See "State of Washington, Attorney General's Recommended Process for Evaluation of Proposed Regulatory or Administrative Actions to Avoid Unconstitutional Takings of Private Property." WAC 173-26-186(5).					
 evidence of local government approval (or a locally approved "statement of intent to adopt"); new and/or amendatory text, environment designation maps (with boundary descriptions and justification for changes based on existing development patterns, biophysical capabilities and limitations, and the goals and aspirations of the local citizenry); a summary of the proposal together with staff reports and supporting materials; evidence of SEPA compliance; copies of all comments received with names and addresses. WAC 173-26-110 Submittal must include clear identification and transmittal of all provisions that make up the SMP. This checklist, if complete, meets this requirement. WAC 173-26-210(3)(a) and (h). 					
Shoreline Inventory					
Inventory of existing data and materials. WAC 173-26-201(3)(c)(i) through (x).	Pg. 7-9	Table of significant documents collected during the inventory process and where they apply in the WAC 173-26-201 (c) i-x checklist.			
For jurisdictions with critical saltwater habitats, see WAC 173-26-221(2)(c)(iii)(A)&(B).					

STATE RULE (WAC) REQUIREMENTS	LOCATION	COMMENTS			
Shoreline Analysis					
Characterization of shoreline ecosystems and their associated ecological functions that: identifies ecosystem-wide processes and ecological functions; assesses ecosystem-wide processes to determine their relationship to ecological functions; identifies specific measures necessary to protect and/or restore the ecological functions and ecosystem-wide processes. WAC 173-26-201(3)(d)(i)(A). Demonstration of how characterization was used to prepare	Pg. 12-24	Lists the main ecological functions within distinct shoreline segments. Also, this section identifies degraded areas and restoration opportunities.			
master program policies and regulations that achieve no net loss of ecological functions necessary to support shoreline resources and to plan for restoration of impaired functions. WAC 173-26-201(3)(d)(i)(E). For vegetation, see WAC 173-26-221(5). For jurisdictions with critical saltwater habitats, see WAC 173-26-221(2)(c)(iii)(B). Description of data gaps, assumptions made and risks to ecological functions associated with SMP provisions. WAC 173-26-201(2)(a)					
Characterization includes maps of inventory information at appropriate scale. WAC 173-26-201(3)(c)	Pg. 10	General Map Segments Ecological Function Maps			
Use analysis estimating future demand for shoreline space and potential use conflicts based on characterization of current shoreline use patterns and projected trends. Evidence that SMP ensures adequate shoreline space for projected shoreline preferred uses. Projections of regional economic need guide the designation of "high-intensity" shoreline. WAC 173-26-201(3)(d)(ii); WAC 173-26-211(5)(d)(ii)(B)	Pg. 11-12 Pg. 24-28 Pg. ?	Existing land use areas Future land use and demands. Summaries of future land use documents for the City, Parks and the Port. Land use maps			
For SMPs that allow mining , demonstration that siting of mines is consistent with requirements of WAC 173-26-241(3)(h)(i).					
 evidence that SMP preserves adequate shorelands and submerged lands to accommodate current and projected demand for economic resources of statewide importance (e.g., commercial shellfish beds and navigable harbors) based on statewide or regional analyses, requirements for essential public facilities, and comment from related industry associations, affected Indian tribes, and state agencies. Evidence that public access and recreation requirements are based on demand projections that take into account activities of state agencies and interests of the citizens to visit public shorelines with special scenic qualities or cultural or recreational opportunities. WAC 173-26-251(3)(c)(ii) & (iii) Optimum implementation directives incorporated into comp plan and development regulations. WAC 173-26-251(2) & (3)(e) 	Pg. 24-25	SSWS is addressed in the Comprehensive Plan Document summary.			
For GMA jurisdictions, SMP recreational provisions are consistent with growth projections and level-of-service standards contained in comp plan. WAC 173-26-241(3)(i)					

STATE RULE (WAC) REQUIREMENTS	LOCATION	COMMENTS
 Restoration plan that: identifies degraded areas, impaired ecological functions, and potential restoration sites; Establishes restoration goals and priorities, including SMP goals and policies that provide for restoration of impaired ecological functions; Identifies existing restoration projects and programs; Identifies additional projects and programs needed to achieve local restoration goals, and implementation strategies including identifying prospective funding sources sets timelines and benchmarks for implementing restoration projects and programs; provides mechanisms or strategies to ensure that restoration projects and programs will be implemented according to plans and to appropriately review the effectiveness of the projects and programs in meeting the overall restoration goals. WAC 173-26-186(8)(c); 201(2)(c)&(f) 	Pg. 28-31 Pg. 31-32 Pg. 32-33	Looks at degraded areas and restoration opportunities within these areas. Establishes restoration priority and possible funding
For SSWS , identification of where natural resources of statewide importance are being diminished over time, and master programs provisions that contribute to the restoration of those resources. WAC 173-26-251(3)(b)	Pg. 29-31	Addressed in the restoration opportunities and degraded areas section. Areas which may diminish over time are the golf course area/ Clover Island. Pollution and run-off control is important in these areas.
Evidence that each environment designation is consistent with guidelines criteria <i>[WAC 173-26-211(5)]</i> , as well as existing use pattern, the biological and physical character of the shoreline and the goals and aspirations of the community. WAC 173-26-211(2)(a). WAC 173-26-110(3)	Pg. 34-35	Preliminary suggested designations.
Lands designated as "forest lands of long-term significance" under RCW 36.70A.170 are designated either natural or rural conservancy shoreline environment designations. WAC 173-26-241(3)(e).		
For SSWS , demonstration that environment designation policies, boundaries, and use provisions implement SMA preferred use policies of RCW 90.58.020(1) through (7). WAC 173-26-251(3)(c)		

STATE RULE (WAC) REQUIREMENTS	LOCATION	COMMENTS
Assessment of how proposed policies and regulations cause, avoid, minimize and mitigate cumulative impacts to achieve no net loss policy. Include policies and regulations that address platting or subdividing of property, laying of utilities, and mapping of streets that establish a pattern for future development. Evaluation addresses:		
(i) current circumstances affecting the shorelines and relevant natural processes; (ii) reasonably foreseeable future development and use of the shoreline (including impacts from unregulated activities, development exempt from permitting, and other incremental impacts); and (iii) beneficial effects of any established regulatory programs under other local, state, and federal laws. WAC 173-26-201(3)(d)(iii) and WAC 173-26-186(8)(d)		
For jurisdictions with critical saltwater habitats, identification of methods for monitoring conditions and adapting management practices to new information. WAC 173-26-221(2)(c)(iii)(B).		
For SSWS , evidence that standards ensuring protection of ecological resources of statewide importance consider cumulative impacts of permitted development. WAC 173-26-251(3)(d)(i)
